

FOCUS ON:

RENISO refrigeration oils for natural refrigerants

Our RENISO product family stands for purity, outstanding performance, operational reliability and high efficiency in demanding refrigeration and heat pump applications:

- Excellent thermal and chemical stability
- Very good compatibility with materials and seals
- High efficiency and long oil service life
- Proven performance with NH_3 , CO_2 and hydrocarbons, as well as with HFC, HFO and HFO/HFC refrigerants
- Suitable for residential heat pumps as well as demanding high-temperature applications
- Supporting sustainable and future-proof system concepts

PRODUCT LAUNCH: RENISO LPG 460 W

We are proud to introduce **RENISO LPG 460 W**, a high-performance refrigeration oil designed for advanced heat pump applications:

- Fully synthetic refrigeration oil based on special **polyalkylene glycols (PAG)**
- Developed for **high-temperature heat pump systems**
- Optimized for **hydrocarbon refrigerants**
- Suitable for **pentane (R601)** and **iso-pentane (R601a)**
- **Controlled miscibility** with hydrocarbon refrigerants
