

Press release

Mannheim, February 2017

Introduction of the new TITAN GT1 LONGLIFE IV SAE 0W-20 engine oil for the new VW specifications VW 508 00 / 509 00

General information

Specifications 508 00 and 509 00 concern the so-called “VW Blue Oil” for the latest generations of engines from VW. The specifications demand an oil in viscosity class SAE 0W-20 with a reduced HTHS viscosity of at least 2.6 mPa.s. This allows fuel savings of at least 4% to be achieved. The first of these engines have been available on the market since the end of 2015. Specifications VW 508 00 and 509 00 are not backwards compatible with previous VW specifications. In contrast, specification VW 504 00 can be used wherever older VW specifications for petrol engines are required, for example. For diesel engines, specification VW 507 00 can also be used for the corresponding older diesel specifications. R5 and V10 TDI engines up to model year 2006 are the exception. These engines must be filled with an engine oil according to VW 506 01 (TITAN Supersyn LONGLIFE PLUS SAE 0W-30). For VW engines that require VW 508 00 / 509 00, engine oils with specification VW 504 00 / 507 00 can currently be used as an option.

TITAN GT1 LONGLIFE IV SAE 0W-20

The new TITAN GT1 LONGLIFE IV SAE 0W-20 was approved by VW in accordance with VW 508 00 / 509 00 and is now available to dealerships and workshops.
