

Technology
that pays back.

Total Productive Maintenance
for the Food Industry.

LUBRITECH
Special Application Lubricants

Improving productivity through Overall Equipment Effectiveness.

Our lubricants and service support options are geared towards benefiting your company and helping build a valuable maintenance program.

High performance lubricants keep your operations running whilst our advanced monitoring tools remove any unwanted surprises before they happen.

Your benefits.

Reduced oil consumption

Increased reliability

Extended maintenance intervals

Reduced unplanned breakdowns

Operational efficiency

Supporting your TPM goals.

Lubrication is an essential part of machinery maintenance for every food and beverage production facility. The starting point of an effective lubrication programme is the detailed mapping of all machine lubrication points, their working conditions, lubrication requirements and criticality. FUCHS provides the products and technical support services to deliver this goal to your company.

CASSIDA Lubricants.

NSF authorised lubricants and cleaners. Increased efficiency, productivity & OEE.

Condition based monitoring.

Aspect optimisation and downtime prevention.

Lubrication services.

Operational support from training to on-site management.

Support tools.

Modern solutions for maximum control and efficiency.

CASSIDA food grade lubricants.

Offering users guarantees of reliability, efficiency and productivity, our OEM approved lubricants have been developed specifically to match the demands of the modern food and beverage manufacturing industry.

CASSIDA food grade lubricants are the **most** advanced and extensive range of NSF H1 lubricants available today and supported by our range of A1, K1 and K2 registered cleaning products.

Services & condition based monitoring.

The complexity of your maintenance program will dictate the skill level and support level need for personnel involved in lubrication and reliability programmes. FUCHS provides expert support and tools to determine lubricant selection, condition based monitoring programs, site lubrication surveys, re-lubrication frequencies and training as well as lubrication storage, management and disposal for audit compliance.

Lubrication training

Lubrication surveys

Lubrication planning

Lubrication scheduling

BRC audit compliance

Condition monitoring

Stores management

Lube equipment

Fluid management.

To support our customers' TPM initiative, FUCHS has developed 'FLUIDS LIVE', a web-based interactive maintenance program designed to plan, record, track and report all lubrication and condition monitoring activities.

Bespoke to each user, FLUIDS LIVE provides real-time, accurate reporting on asset condition and planned maintenance tasks to aid operational planning and to ensure maximum reliability and output.

- Weekly reporting
- Exceptions reporting
- Consumption reporting
- Quick update aids informed decisions
- Historical reporting
- Automated scheduling
- Data capture
- Aids maintenance planning

Innovative lubricants need experienced application engineers

Every lubricant change should be preceded by expert consultation on the application in question. Only then the best lubricant system can be selected. Experienced FUCHS engineers will be glad to advise on products for the application in question and also on our full range of lubricants.

Our UK manufacturing site holds the following quality standards.

- ISO 9001
- ISO 50001
- ISO/TS 16949
- OHSAS 18001
- ISO 14001
- AS 9100
