FUCHS is the world’s largest independent manufacturer of lubricants, serving a wide variety of industries including aerospace, food and automotive. As a result, we understand the importance of implementing a good hand care routine, whether it be on the shop floor or in the offices.

The VELVETONE range of hand care products has been specifically developed to protect, clean and care for hands.
Skin Protection

Your skin forms a barrier to protect you from dirt, bacteria and allergens present in the environment. However, contact with strong chemicals and substances results in your skin becoming inflamed and potentially developing contact dermatitis. To help prevent this, a pre-work cream should be used before contact with any irritants to provide an extra layer of protection for your skin.

Skin Care

Hand washing and contact with contaminants can strip your skin of its natural oils. After-work cream should be applied following hand washing to help replenish the moisture lost.

Skin Cleaning

It is important to ensure that the right hand cleaner is used throughout the day, whether it be a mild soap for everyday washing or a beaded hand cleaner designed to remove even the toughest of grime. When in a waterless environment, hand wipes can be used to ensure hand cleanliness is maintained.

Anti-bacterial

Reducing levels of bacteria is important to stop the spread of infections and contamination. Our anti-bacterial and sanitising products are free of alcohol, dye and perfume, meaning they are suitable for use in a variety of places, including hospital, prisons and food manufacturing sites.
An easily absorbed, non-greasy skin protection cream designed to provide an extra barrier between the skin and any chemicals or irritants. Contains no dyes or perfumes.

**Recommended for:**
The protection of skin

**When to use:**
Before commencing work where contact with chemicals, irritants and greases may occur. Should be reapplied at least every four hours or after washing hands in between work.

When contact with irritants and chemicals is unavoidable, it is important to ensure a good hygiene routine is employed:

- Before commencing work where contact with irritants may occur, apply a skin protection cream to provide an extra barrier between skin and irritant.
- Where possible, wear protective gloves and clothing to minimise the risk of contact.
- Ensure hands are washed thoroughly. Use a beaded hand cleaner to remove ingrained dirt and soilings.
- Once hands are clean, dry thoroughly. Use a skin conditioning cream to help replace any lost moisture from the skin.
Skin Cleaning

**LIGHT DUTY HAND CLEANERS**

**VELVETONE**

*Hand Wash Gentle*
A lightly fragranced hand wash specially formulated for frequent use. Leaves hands feeling clean, without drying out the skin.

**Recommended for:** Everyday use  
**When to use:** Regularly throughout the day as part of general good hygiene practice

*Hand Wash Luxury*
A luxurious hand wash with added moisturisers to keep hands feeling soft. Pleasantly fragranced with an attractive pearlescent look.

**Recommended for:** Everyday use  
**When to use:** Regularly throughout the day as part of general good hygiene practice

**VELVETONE**

*Hand Wipes*
High performance hand and surface wipes that are effective at removing dirt, oil and grease. Leaves surfaces and skin non-sticky with a refreshing fragrance. Suitable for use where access to water is limited.

*Hand Wipes Ultra*
Uses the same high power formulation as the standard VELVETONE Hand Wipes but with a thicker cloth for extra cleaning power. Very effective at removing dirt, oil, grease and paints from hands and surfaces. Designed for use where access to water is limited.
**Skin Cleaning**

**HEAVY DUTY HAND CLEANERS**

**Fuchs VELVETONE Hand Wash Super**
A freshly fragranced, non-beaded hand cleaner specially formulated to provide strong cleaning power.

**Recommended for:** The removal of medium to heavy soilings

**When to use:** After contact with a broad range of soils and dirt

**Fuchs VELVETONE Hand Wash Pro**
A heavy duty, non-abrasive beaded hand cleaner. Provides gentle yet effective cleaning with a fresh lime fragrance.

**Recommended for:** The removal of heavy soilings

**When to use:** After contact with dirt and grease

**Fuchs VELVETONE Hand Wash Ultimate & Ultimate G**
Formulated to remove even the most ingrained of soilings, this orange fragranced, beaded hand cleaner provides ultimate cleaning power. Available in a semi-fluid or gel version.

**Hand Wash Ultimate:** a semi-fluid, dispenser ready option.

**Recommended for:** The removal of heavy soilings

**When to use:** After contact with dirt, grease and oil

**Hand Wash Ultimate G:** a gel version with added polybeads for stronger cleaning power.

**Recommended for:** The removal of very heavy soilings

**When to use:** After contact with dirt, grease, oil and creosote
An after-work cream which moisturises and conditions hands. Easily absorbed into the skin, with a pleasant, mild fragrance.

**Recommended for:** Reconditioning of hands

**When to use:** After washing hands, to replace moisture lost through contact with chemicals, irritants or heavy duty soaps.
**Anti-bacterial**

**VELVETONE Hand Wash Anti Bac**

A non-perfumed, anti-bacterial soap. Perfume and dye free.

**Recommended for:** Cleaning of hands, particularly before and after the handling of food

**When to use:** Before entering and after leaving food preparation areas. Use in conjunction with VELVETONE Hand Sanitise

*Our anti-bacterial products are ideal for use in low risk food manufacturing and processing plants as they are non-perfumed, contain no dyes and are alcohol free.*

**VELVETONE Hand Sanitise**

A water based foaming sanitiser, highly effective at reducing levels of bacteria. Contains aloe vera and added emollients to keep skin feeling soft. Available in 1.8L pouches as well as a handy 200ml foamer for personal or desk use.

*Foam based sanitisers are more cost effective than liquid or gel sanitisers, giving up to 6 times more applications.*

**Recommended for:** Sanitising of hands before and after contact with food, people, instruments etc

**When to use:** After washing hands to reduce bacteria levels. Can also be used regularly throughout the day as part of general good hygiene practices

*Water based sanitisers provide many benefits over the use of alcohol based products:*

- Alcohol free, so does not dry out skin
- Non-flammable and therefore easier to transport and store
- Virtually odourless
- Longer lasting residual sanitisising effect on skin
- Eliminates any concerns from groups or organisations with reservations about the use of products containing alcohol
**Dispensing**

**VELVETONE**

**1.8L Pouch Dispensers**

We have a range of robust dispensers with a coloured, translucent window for ease of identification. The pouches can be easily changed with a universal key.

**Wash and Cream Dispenser**
Suitable for all our non-beaded hand washes and creams. Provides a 2ml shot of liquid.

**Beaded Dispenser**
Suitable for the beaded hand cleaners, with a thicker nozzle that ensures the beads can easily pass through. Provides a 3ml shot of liquid.

**Foaming Dispenser**
Suitable for VELVETONE Hand Sanitise. With a special nozzle to produce a 0.6ml shot of foam.

Bulk soap dispensers are regularly ‘topped up’ with fresh soap rather than being thoroughly emptied and cleaned, meaning any bacterium which is present in the dispenser or soap contaminates the fresh soap. By using a pouch dispenser you can ensure your soap is hygienic and uncontaminated every time. Our dispensers can easily be cleaned before each soap change to give the best performance for your washroom.

**Accessories**

VELVETONE Hand Wash Ultimate G in 4.5L jars is accompanied by a range of dispensing accessories to assist users.

**4.5L Pump**
A hard wearing pump dispenser for VELVETONE Hand Wash Ultimate G. The thick gel and polybeads are easily dispensed through the large nozzle.

Helps reduce the risk of infection and cross contamination.
