

Silkolene[®]

SUPERIOR MOTORCYCLE OILS

THE ALL NEW **RSF RANGE**

WHY HAVE WE CHANGED?

The FUCHS SILKOLENE RSF range (formerly known as PRO RSF) has replaced their standard fork oil counterparts.

Our premium high performance RSF range, available in: 2.5W, 5W, 7.5W, 10W and 15W is a race / road / track proven suspension fluid already in use and chosen by many of today's market leading suspension manufacturer's and currently already used as original equipment by many of today's modern motorcycles.

The high VI contained in the FUCHS SILKOLENE RSF range provides a far more consistent damping performance throughout the operating range due to the fact the viscosity changes less with increasing temperature.

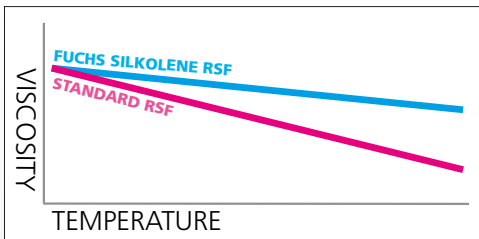

▶ select the correct ISO rating or preferred Weight from the new blue RSF front labels

The end result being that suspension units will perform at similar high levels all day, throughout continuous riding and not lose any performance or 'feel' compared to standard suspension fluids thinning out as temperature rises and fading in responsiveness.

and to instead use SAE & ISO industry standards for viscosity cuts to streamline and simplify our product range.

RSF 2.5	RSF 5	RSF 7.5	RSF 10	RSF 15
ISO 15	ISO 22	ISO 32	ISO 46	ISO 100

As there is no industry standard for fork oils each manufacturer has a different viscosity for their own particular "wt" oil. We have decided to move away from the use of weight

Choosing the correct suspension fluid from the enhanced RSF range could not be easier, simply select the correct ISO rating and / or the preferred Weight from the new blue RSF front labels, or use our cross reference table:

CROSS REFERENCE TABLE

RSF customer selection cross reference table:	
Old Fork Oils	Now Select
FORK OIL LIGHT SAE 5	RSF 5
FORK OIL MEDIUM SAE 10	RSF 10 (Standard / firm feel) or RSF 7.5 (Standard / light feel)
FORK OIL INTERMEDIATE SAE 15	RSF 15 (Standard / firm feel) or RSF 10 (Standard / light feel)
FORK OIL HEAVY SAE 20	SF 20
FORK OIL EXTRA HEAVY SAE 30	SF 30
