

**TRIED. TESTED. PROVEN.**  
The recognised market leader.

## Complete Fluid Management

- Individually designed dashboard to track & trend fluid conditions
- Remote access to key machine operating data
- Eliminates unforeseen production problems
- Assists in preventative maintenance planning
- Proven to reduce fluid consumption & expenditure

# The complete, web-based fluid management service

## Fluids Live Supporting our customers

Fluids Live is an easy to navigate, web based, recording, tracking and reporting tool with integrated KPI measurements; to give maintenance and production engineers immediate and remote access to the current condition of fluids in use.

Fluids Live is an on-line platform, offering software free centralised management of data, resulting in no investment requirement from users.

Information can be updated in as little as 2 hours from the time of collection of data giving users all of the information from which to make informed decisions on maintenance scheduling, production planning and other operational activities.

- All data collated and stored remains confidential and provides customers with a history of fluid usage, condition and concentration.
- Proactive use of the data will allow for better inventory control, reduced and simplified waste management activity and accurate analysis of fluid consumption by machine, cell or process.
- The data allows users to plan maintenance strategies more effectively and help reduce fluid usage expenditure.
- Each data reporting system is designed and developed by the FUCHS team to the bespoke requirements of the user.
