

FUCHS BRAKE CLEANER

Brake and clutch cleaner

Description

This colourless and odourless brake and clutch cleaner neutralises the problem of harmful airborne and associated dust from brake components and clutch plates, whilst also providing an excellent cleaner for the removal of grease, oil and dirt. It evaporates completely in seconds, leaving no residue. Its active ingredients are designed not to harm friction materials or seals.

Directions for Use

Shake the can thoroughly before use.

Hold in an upright position, spraying directly onto the component surface from a distance of 8-12 inches.

The highly directional button ensures accurate positioning of the lubricant.

Always ensure any guarding is in place when treating moving equipment. Re-apply as required.

It should be sprayed liberally over the parts to be cleaned and then allowed to penetrate and evaporate before the parts are wiped with a clean cloth. Always test brake systems thoroughly after cleaning.

NOTE

Follow the safety information printed on the cans to ensure safe application.

Advantages/Benefits

- Large 500ml aerosol can
- Solvent leaves no residue
- Contains no CFC propellants - ozone friendly

Caution

- Pressurised container
- Protect from sunlight and do not expose to temperatures exceeding 50°C
- Do not pierce or burn, even after use
- Do not spray on a naked flame, or any incandescent material
